HAND FORGED

The

KETLER-ELLIOTT ERECTION CO.

155 No. Clark Street
Chicago, Illinois

Telephone Central 8544

Foreword

This catalog has been prepared to present, clearly and concisely, the KETOCO line of standardized, hand forged tools for the use of the general contracting, foundry, ironworking trades, railroads, etc.

We have endeavored to give full and definite information concerning KETOCO tools. Lists, sizes, specifications, weights, etc., are arranged in the natural classification to which each tool belongs so as to be readily accessible for quick reference.

We have shown each KETOCO tool by a working drawing, feeling that such illustration will convey most clearly which tool best fills your requirement.

We have not included any odd or unusual variations from the standard tools in general use by the trades. We will gladly manufacture any such tools for you on receipt of your specifications and invite your inquiries which will receive prompt and courteous attention.

We have given to each tool both a separate number and a code name for your convenience in ordering and also to do away, as much as possible, with annoying mistakes in shipment. Your careful attention in ordering by the right number will insure prompt and efficient service.

We will be pleased to furnish you with our discounts upon application and have left space in this catalog for you to enter them for your own reference.

KETOCO tools are the finest in quality and workmanship that it is possible to produce with the use of the latest advanced methods of tool forging. Their use will convince you that quality tools lower your production costs.

The KETOCO guarantee covers every tool shipped under our name. We are sure you will find the information in this catalog of value and will keep it in your files, easily accessible, for ready reference.

The
Ketler-Elliott Erection Company

Standard Hand Tools

The KETOCO tools shown in this section are best adapted for hand work by the Machinist, Tool & Die Maker, and the General Foundry Trade. Any tool not listed needed for special requirements will be made up to specifications.

Hand Chisels for Sheet Iron Workers are listed in Iron Workers' Section.

*Indicates tools carried in stock for immediate delivery.

Order all tools by number.

Guarantee

The purchase of a KETOCO tool is not a sale until the customer is fully satisfied of its value. KETOCO tools are forged from the highest grade of tool steel and are as perfect in workmanship and quality as it is possible to make.

Any KETOCO tool which proves defective is subject to credit or replacement excepting where it has been in the fire for re-dressing.

Terms

Net, 30 days, F. O. B. Chicago.

Standard Pneumatic Tools

KETOCO Pneumatic tools are made of the highest grade of genuine crucible alloyed tool steel especially produced for this purpose. We do not use a standard or regular grade of straight carbon tool steel in our pneumatic tools.

Guaranteed against upsetting or breakage at the shank up to the first redressing in your shop, or, for the life of the tool if redressed by us.

Special tools will be made to fill your requirements.

Heat Treatment

KETOCO tools are produced by the most advanced methods in the working of high grade, crucible tool steel. Their manufacture conforms to the highest knowledge and skill acquired by competent tool-makers, who, now more than ever before, make a careful study of the heat treatment of steel in a scientific manner. The KETOCO plant is equipped with the most modern equipment for hardening tools, which is reduced to an exact science by the use of pyrometers and improved gas furnaces.

It is impossible to give here any general rules for re-dressing KETOCO tools because of their many sizes and shapes, each of which require special treatment.

Nevertheless, your tool dresser, with ordinary care and judgment, where proper equipment is lacking, is capable of redressing KETOCO tools by heating and hardening on the regular Blacksmith's forge in coke or charcoal fires. An experienced steel worker will have no difficulty in obtaining good results.

If you wish us to redress KETOCO tools in our plant, a small nominal charge will be made.

Ironworker's Special Pneumatic Chisels

Experience has shown the need of a sturdier tool for the use of the Sheet Iron trade in general.

KETOCO tools herein listed are especially adapted for this purpose, and, while almost identical with the KETOCO Standard Pneumatic tools, are of a greater strength due to their construction.

We are prepared to make tools to specifications required for special purposes.

*Indicates tools carried in stock for immediate shipment.

Order all tools by number.

Beading Tools

KETOCO Beading tools, pneumatic and hand, are made both to the accepted railroad specifications of which we make a specialty, and to the dimensions adopted as standard by the Boilermaker's trade. They are made of a genuine crucible alloyed tool steel so hardened and heat-treated as to give maximum toughness with the required hardness necessary to withstand the wearing action of beading flues.

*Indicates tools in stock for immediate shipment.

Clay Hoes — Flatters — Fullers, Top and Bottom

We are prepared to make Flatters and Fullers, top and bottom, to specifications where a quality product is desired.

We also make Contractor's Caisson Grub Hoes of crucible tool steel.

Ironworker's Hand Tools

The KETOCO tools shown in this section are almost identical with those listed under KETOCO Standard Hand Tools except for their more sturdy construction which renders them more capable of withstanding the harder usage given by the Sheet-Ironworking trade.

Any tools needed for special purposes will be made to specifications.

* Indicates tools carried in stock for immediate shipment.

Order all tools by number.

Sling Chains, Double and Single

We are prepared to forge to your order single or double sling chains from the finest quality dredge chain for crane or derrick work where heavy loads are moved over the heads of the workmen.

Rings and hooks will be made of the highest grade double refined iron, equal in physical properties to the Swedish Iron. When it is possible again to procure Swedish iron, we will use it exclusively for this class of forging.

Riveting Hammers

KETOCO Riveting Hammers are hand forged from a genuine crucible tool steel of special analysis, hardened by our own process to give a tough center with the required outside hardness preventing chipping of the corners and edges.

We will furnish hammers of any specifications necessary to your needs.

*Denotes hammers carried in stock for immediate shipment.

Order all tools by number.

Forging

We are prepared to forge to your specifications, where KETOCO quality products are desired any of the following items:

Shackles and Pins.

Derrick Hooks.

Derrick Irons, etc.

Grab Hooks with Rings.

Grab Hooks with Chains.

Derrick Foot Hooks and Chains.

I Beam Clamps.

Stone Setter's Clamps.

Stone Tongs.

Pavement Tools

We have brought together here a few tools of special interest to the street paving worker, especially constructed for his particular needs.

We are prepared to make tools needed for special purposes.

*Shows tools carried in stock ready for immediate delivery.

Order all tools by number.
